

ETEC 500 Week 2: Compiling a Reference List

By: Mary Hui

Date: January 24, 2021

Task: Undertake a search of research literature on a research question of your choice (for example, the question you explored in your concept map last week), to compile a small collection of published research studies relevant to this research question.

Research question Breakdown:

| Broad Topic | Struggles | Potential Value? |
|--|---|--|
| Integrating New Nursing Grads into the working environment | Lack of research / budget for technologies in Healthcare education | Lack of budget in healthcare system – Technology cannot be integrated due to lack of research or funding. |
| | Lack of confidence in accomplishing certain tasks after graduation. Transitioning from school to the workplace | What are the main topics they are struggling with? How do we ensure that we provide the best education or information to New nursing grads so they will be confident in accomplishing the tasks they are assigned to? |
| | Lack of Support | What are the stressors? Do they have access to help? We can find better support once we find out what the stressors are. Are they looking for the right place for help? Do they have staff readily available to troubleshoot any inquiries? We can find out where new grads are looking for help, perhaps we can lead them to a centralized hub? |
| | Frustration with Work Environment | Do nursing staff feel like they belong to the unit that they are assigned to? What can each unit do to ensure sufficient support when integrating staff into their unit? |
| | Culture and background | What is the demographic of nursing staff that is being hired? Do they feel a sense of belonging in the workplace? What systems can we implement to welcome and include people from all cultures and backgrounds? |

Requirements

- Task: The research question you sought to find relevant literature on
 - **Research Question:**
 - The quality of patient care is impacted by the confidence and performance of nursing staff. What is the new grad nursing experience and how do we enhance our support to new nursing grads using technology and innovation?
 - **Revised:**
 - The quality of patient care is impacted by the confidence and performance of nursing staff. How can nursing educators use education technologies such as simulations to prepare new nursing graduates for integration to the working environment.

- Task: The keywords you used in your search of the literature.
 - **Keywords:**
 - **New Nursing Graduates**
 - **New Nurse stress***
 - **grad nurse stress* "British Columbia"**
 - **"Nurse Graduate" journey**
 - **"New Graduate Nurse" experience***
 - **patient safety new graduate nurse***
 - **patient care new graduate nurse***
 - **"Technology and innovation" new grad nurses**
 - **"Technology and innovation" and "new nurses"**
 - **"new nurse*" innovation strategy**
 - **"new nurse*" innovation strategy Canada**
 - **virtual health new nurses**

- Task: The name of the reference manager application that you have used to compile your reference list.
 - **Ref Works**
